

OUTPOST SOLAR

AMS-6 | 5.76kW Armored Modular Solar

Outpost Solar designs and manufactures innovative solar energy systems. Our creative solutions for solar energy implementation range from 5.76kW off-grid systems designed for the most remote areas of the world, to grid-tied systems that generate a megawatt or more. Outpost Solar provides its clients with the necessary expertise to assess their needs and maximize the return on their investment. Our professionals provide complete project management services: design build, installation, financing, and tax incentive optimization.

Outpost Solar's Modular Solar Systems provide reliable power where it is needed most. Whether it is in the most remote areas of the world or in the aftermath of a natural disaster, the MS-6 and AMS-6 allow long-term operations to operate 24-hours/day, 7 days/week without resupply.

Virtually maintenance-free, these systems can operate for years with only occasional cleaning or can be quickly secured in the face of imminent danger. The MS-6 and AMS-6 have integrated power management systems that allow for real-time monitoring to ensure optimized power usage.

Licensed Under Patents Pending

Able to Produce Power Immediately - Delivered with Batteries Fully Charged

Designed to Support a 380 Amp-Hour Load per Day for Five Days with no Solar Input

Built to Last - Available with Armor to Resist Bullet Penetration up to and Including 7.62mm

102 Long Street • Pulaski, TN 38478 • Phone: 800.416.8374 • Fax: 866.880.2576
